LATE-FLOWERING CULTIVARS	Court Pendu Plat	

Notes:

* indicates apples for which the records are still not 100% convincing but placement as close as possible at present (with thanks to Clive Winmill).

indicates apples at Rippon Lea for which the identification is unauthenticated and may well be false (source: Clive Winmill).

There are some apples dealt with in Chapter 2 not included in this table; this is because there is inadequate flowering data.

For information about apples included in this list but not described in Chapter 2, see Clive Winmill's *Apples Old & New* and/or other references listed in Further Reading.
