Item Name	Description	Height
Acronychia	A small to medium rainforest tree with striking bright white fruit that is	
oblongifolia -	produced during autumn and winter. A good food source for birds	
Common Acronychia	and can be eaten by humans, although they are quite acid. 12m	5-12m
Acronychia	Fast growing and adaptable tree with broad, furry, trifoliate leaves,	
pubescens - Hairy	white flowers and clear yellow aromatic fruits with a sweet, refreshing	
acronychia	and fragrant flavour. Prefers good soil and protection from frost.	4-10m
Acronychia		
wilcoxiana - Silver	Bushy small tree with dark, shiny leaves and pretty white edible fruit.	
Aspen	Hardy in coastal areas in full sun, provided water is available.	3-8m
	Shrub or small tree with bushy, light-green foliage, cream flowers and	
Alectryon coriaceus -	eye-catching, bird-attractive, red & black fruit. Hardy in coastal	
Beach Alectryon	conditions and moderately fast growing.	1-6m
	Very fast small to medium tree. Excellent pioneer species with open	
Alphitinia petrea -	crown of rounded green leaves with silver backs. Bird attractive. Full	
Pink Ash	sun.	8m
	A versatile plant for Aboriginal people. The ginger tasting roots were	
	eaten and the flesh from the bright blue fruit. The large leaves were	
Alpinea coerulea -	thatched and used to make shelters and to wrap food for cooking. 2m	
Native Ginger	Brilliant red under leaf.	2m
Aristolochia	A vine of temperate subtropical rainforests. The vine attracts one of	
praevenosa -	the largest and most spectacular butterflies and is considered an	
Richmond Birdwing	endangered species. Plants require support on which to climb, a	
Vine	trellis, a fence or over a stump.	Vine
Arystera distylis -	Small tree, with showy pink new leaf growth in winter, fruits are	
Twin-leaved	developed in summer and are bird attracting. Hardy once	
Coogera	established.	6-7m
	A low spreading shrub with dainty foliage developing a reddish shade	
	in colder climates. The white tea tree like flowers are followed by	
Austromyrtus dulcis -	sweet edible mauve-white speckled berries. A very decorative	
Midjim	groundcover.	0.5m
•	Great ground cover or screening plant that is very hardy, however	
Cissus antarctica -	looks its best when watered and feed well. Common food source for	\/baa
Water Vine	rainforest pigeons in late summer.	Vine
	This is an excellent container plant with unusual foliage. It may be	
Cordyline petiolaris -	multi-planted for good effect but needs a good big pot to reduce the	
Broad leaved palm	risk of being blown over in the wind. An under story rainforest plant.	4
lily	2m	4m
Cordyline stricta -	Medium shrub found in all major types of rainforest north of Sydney	
Narrow-leaved palm	to the McPherson Range. An elegant plant with purple to black fruit,	2m
lily Cryptocory	well suited to smaller gardens to create a lushious rainforest feeling	3m
Cryptocarya	A native rainforest shrub appearing in subtropical rainforests north of	
laevigata - Glossy Laurel	Lismore. A highly ornamental tree with dark, glossy foliage and bunches of small, yellow flowers followed by striking bright-red fruit.	4m
Cupaniopsis	An attractive, fast growing and hardy small to medium tree well suited	4111
anacardioides -	to coastal areas. Good wildlife food source. Makes a excellent street	
Tuckeroo	tree or pioneer in reforestation.	9m
Cupaniopsis	A hardy small tree with a spreading crown creating good shade.	3111
parvifolia - Small	Small panicles of pale flowers are followed by bird-attracting fruits.	
leaved Tuckeroo	Tough in drier sites, reasonably fast requiring little care.	6-9m
	An outstanding small tree that prefers warm conditions and some	0.011
Davidsonia pruriens	shade. Striking edible purple fruits that make excellent jam. The	
var jerseyana -	var.jerseyana is the southern form which is generally a larger plant	
Davidson's Plum	than its the northern var. pruriens.	8m
	Outstanding small tree for warm position or indoors. Large pinnate	
Davidsonia puriens -	leaves & many-trunked habit make it a striking specimen plant. The	
Davidsons Plum	edible purple fruits make excellent jam. Prefers some shade.	8m
Dianella caerulea -	An evergreen tuft-forming perennial. Produces panicles of small star-	0
Blue flax-lily	shaped flowers in summer. Flowers followed by blue berries.	0.5-1m
	Small to medium sized tree with dense crown. Fruit is a light brown	
	thin-walled capsule to 6cm across containing seeds enclosed in a	
Diploglottis campbelli	fleshy aril. Can be kept as a neat and attractive compact rainforest	
- Small leaf tamarind	tree	10-12m
